

Keep helping us Val over the new stadium

I WRITE to thank Cllr Val Letheren for her continued support for the people whose lives have been so changed by the move of Wycombe Wanderers to their new stadium at Adams Park.

On match days our road is used as an overflow car park, not an ideal situation, but I like football. The noise from the stadium I can cope with, I like football. Access to my home on match days is a problem, but there haven't been many of those so far, and anyway I like football.

What I do NOT like are suggestions that the council must resolve the problem of access to the stadium by subsidising a bus service or a multi-storey car park. Council funds are stretched far enough without paying for schemes such as these, after all the football club is a business, other businesses would not expect such treatment.

However, as I believe the club is planning to double the capacity of the ground they must also have a solution to this problem.

I also understand the club hopes to level the spoil, removed during the construction of the stadium, to create a practice pitch but this will give them scope for other en-

terprises as well as saving them the expense of removing it.

There is also talk of investing in golfing facilities. It is obvious that the ambitions of Wycombe Wanderers extend far beyond those of a football club, they sound like a much more broadly-based leisure business. Perhaps we can, in the future, expect rock concerts and speedway too?

Mrs Letheren we rely on you now to continue to safeguard the interests of the locals, the environment and High Wycombe.

You've done all you could until now, please keep it up!

Hugh Thomas-Davies.
