

Life is very hectic at the moment with the first team, it will get worse now we have beaten Barnet and qualified for the next round of the Worthington Cup against Birmingham City. We now have games on the next two consecutive Tuesday's making four in a row following last week and tonight. All this is leading into the fact we do not have a reserve team fixture until Wednesday 20th September when we play Brighton here, kick off 2 pm. As it turns out the decision not to take part in the Avon Combination League Cup looks a good one. Lawrie and I decided not to enter owing to the number of games we would have to play in relation to the size of our squad. Although, like last season, they have split the teams into mini leagues, because more club's have joined the Combination there are more matches to fit in, both in the league and cup. With the injuries on going and some of the younger players being added to the squad we could still be looking to get some trialists in for Combination games. What has been very pleasing in the two matches we have played, we look much more competitive and organised as a team. If we can continue to present ourselves in this fashion I am confident we will do far better this season than the previous two in this league.
