

Fans tell Wasps to buzz off

FOOTBALL: Wanderers fans have voted overwhelmingly against rugby union side Wasps moving to Adams Park.

More than 81 per cent, that's 666 of the 816 fans who responded to the poll on the Bucks Free Press website, said they didn't want the egg chasers groundsharing with Wycombe Wanderers.

Only ten per cent, 82 people, voted in favour of the proposed two year deal and a further 8.3 per cent, 68 people, were undecided.

The voteline ran for two weeks on our website and only one vote was accepted per user.

And it looks as though the majority might get their way. Blues director Graham Peart revealed on Wednesday that Wasps are not happy with the amount of rent Wycombe want to charge them and that they want to 'alter the figures substantially.'

He admitted that he is less confident now about a deal going ahead but could not understand supporters fears about the proposal.

He said: "I'm bemused by the results of the BFP survey. I cannot see where the negatives are for us. Wasps would be paying for a new pitch which would be as good as Liverpool or Chelsea's and they would also be paying us enough to be able to buy a new player."

He also revealed that if Wasps do come in as tenants, Wycombe would go the extra mile and lay undersoil heating.
