

# Where is Blues' Terry Gibson?

**Terry Gibson**

TERRY Gibson was absent at a Blues first team match for the seventh game running but Wanderers insist he is still the assistant manager.

The former Wimbledon and Manchester United player was brought to the club by former boss Lawrie Sanchez and there have been concerns over what Gibson's role is in the new regime.

But new manager Tony Adams said Gibson was still assisting him, while Blues director Rod Tomlin said Gibson would be in charge of the reserve team while Pete Cawley assisted Adams with the first team.

Tomlin said: "Terry is the assistant manager. He used to manage the reserve team and he will play a bigger part with that, while Pete will be playing a bigger part with assisting Tony rather than running the reserve team.

"It's not a demotion at all. There's only one assistant manager and it's Terry Gibson."

Tomlin admitted that Gibson had been sidelined when John Gorman was caretaker manager but that Adams had brought Gibson back into the fold and that Gibson was now content.

He said: "Tony's happy to work with Pete and Terry. Terry is the senior guy and he's happy with the situation."

Gibson refused to comment on the situation, except to say that he had a contract and intended to honour it.
