

Relieved Tyson: It was about time I scored

NATHAN Tyson has told of his relief after scoring his first goals of the season on Saturday.

The 23-year-old frontman netted both Wycombe's goals in the 2-2 draw at Oxford.

He said: "It was fantastic to get off the mark and it was about time I scored. It's just a shame we didn't get the win.

"I think I put myself under pressure during the first two games of the season but I went into Saturday's game thinking as long as I set someone up that's fine."

"I was snatching at a few chances in those earlier games and sat down and thought what am I doing wrong but I think it's a case of not thinking about it and I managed to score two.

"John [Gorman] told me that I probably won't get the odd goal here and there.

"He said with my ability I can get twos and threes."

Tyson was Wanderers' top marksman last year with 22 goals which earned him the club's Player of the Year award.

That explosive form took him to the top of a number of managers' wanted lists during the summer including Mike Newell at

Championship new-boys Luton Town.

But Tyson is convinced he won't be the only goalscorer to win praise this year as the Chairboys push for promotion.

He added: "I think we can score goals from everywhere. Roger [Johnson] and Mike [Williamson] coming up for corners and set pieces can score, Matty Bloomfield's been looking really impressive and Kevin Betsy and Stefan Oakes are also a threat."

Wanderers manager John Gorman was delighted to see Tyson get off the mark and predicted plenty more goals for the talented youngster along with the more experienced Tommy Mooney.

He said: "Now that Nathan has scored, I am sure he will get more. He grew in confidence after the goals and I am pleased with how he and Tommy are doing.

"Strike partnerships always take time, but it's great they are now both off the mark."

Celebration:
Nathan Tyson shows just what it means to get off the mark when he bagged his first two goals of the season on Saturday during Wycombe's 2-2 draw at Oxford United
