

YOU HAVE TO DRAW STRENGTH

Gorman tells fans wins will come

JOHN Gorman says Wycombe are bang on target for promotion this season despite their current rash of draws.

The Blues have drawn six of their eight league matches so far this season but Gorman is convinced their luck will turn.

Wycombe led three times at Stockport on Saturday – thanks to Nathan Tyson's hat-trick – but they were pegged back on each occasion and had to settle for a 3-3 score, their fourth successive draw.

Gorman said: "People will criticise us and say we are drawing too many games but in all but one of those draws we have deserved to win.

"I'm disappointed with the points we have dropped but I am not worried.

"We are playing so well that sooner or later those draws will become wins. I know we will get it right."

Those draws have seen Wycombe slip to eighth in the table but they are still only four points adrift of leaders Notts County.

Gorman said: "It is really frustrating because we should be top of the table. We should be sitting with ten more points than we have got. We have drawn five games which we should have won."

But the gaffer is refusing to press the panic button.

He blamed individual errors and a debatable penalty for Saturday's setback and told fans not to worry about the league table at the moment.

He said: "People shouldn't look at the league table. It doesn't matter yet.

"People will criticise us because we let three goals in on Saturday but it wasn't that the defence played poorly.

"It's really frustrating that we didn't win.

"We haven't got the points we have deserved but we will soldier on and if we keep playing like we have been, we will be right up there.

"I am delighted with what we are doing."

And County boss Chris Turner agreed.

He said: "Wycombe are by far the best team we played.

"John has assembled a quality team and they will finish in the top five."

Not again: Frank Talia looks like he has been hit by a sniper after the referee pointed to the penalty spot to hand Stockport their third equaliser
