

Season ticket update for Saturday

Please bring your existing card to gain access to Adams Park.

Wanderers' season ticket holders are asked to bring their existing card to Adams Park to gain access to Saturday's opening League 1 fixture against Bolton Wanderers (k.o. 3pm).

Following the launch of the club's brand new ticketing platform, in partnership with TicketCo, it was intended that each season ticket holder would receive a replacement card, due to the need to issue QR codes which are compatible with the new turnstile scanner technology.

However, there has been a delay in the club receiving replacement stock of the season ticket cards from the supplier, which has meant it has not possible to print and post the new cards in time for the game.

Therefore season ticket holders are asked produce the cards they received earlier this summer at the turnstiles for this fixture, and these will be checked visually to grant access.

Any season ticket holder who has not yet received their card should collect it from the Deliveries entrance, to the left of the shop.

The replacement season ticket cards, which will carry a new unique QR code, will be dispatched in the post in good time ahead of the second home league game against MK Dons on Saturday 17th August.

All supporters are asked to allow plenty of time for the journey to Adams Park, and arrive early to beat the queues at the ticket office, turnstiles and bars, with a bumper crowd expected for the League 1 curtain raiser.
