

OWWSA fund new ice machine at training ground

Association's financial contribution to the club now exceeds £100,000.

The latest financial contribution to the club from the Official Wycombe Wanderers Supporters Association (OWWSA) has funded the purchase of a new ice machine at Wanderers' training ground, aiding the recovery and medical treatment of Chairboys players.

OWWSA make regular donations to the club from the proceeds of their fundraising initiatives, which range from away coach travel, race nights and bingo events at Adams Park, and have made possible the purchase of items including a new mower, computer equipment for the LED screen at Adams Park and many other resources at the stadium.

Chairman Trevor Stroud said: "The ice machine is a vital part of the medical team's armoury at the training ground and after the old machine developed a fault, a replacement one was high on the wish list, given its importance to the squad. OWWSA's generous support of the club has made it possible for us to acquire a new one and, on behalf of Gareth Ainsworth and his staff and players, our thanks go to its committee and members for providing the funds."

Keith Blagbrough, chairman of OWWSA, said: "We are always pleased to see the Association's support make a positive difference to the club, whether it be from facilitating fans getting to away games to get behind the team, or providing financial resource to help fund new equipment. Indeed our total contribution to the football club over the years now exceeds £100,000. We are always keen to welcome new members to help grow the Association which in turn will help the club further, so encourage as many Wycombe supporters as possible to sign up and be a part of what we are achieving."
